A testament to our
Gold Standard in
Exceptional patient care.

- Country's **first standalone fertility center** BirthRight Fertility, Kondapur, Hyderabad received **re-accreditation** from **JCI**
- Country's **first pediatric hospital** to have 2 flagship hub hospitals, one each in Hyderabad and Bengaluru, **awarded with JCI Accreditation**

Dr. Ramesh Kancharla

Pediatric Healthcare Visionary

Chairman & Managing Director

Dr. Ramesh comes from an agricultural background from a village in Andhra Pradesh, India where the accessibility to healthcare was very poor. This motivated Dr. Ramesh to pursue medical education

Garnered rich experience in pediatric gastroenterology and liver disease at best pediatric hospitals in the United Kingdom and got exposed to the nuances of pediatric healthcare model at these hospitals

Lack of quality pediatric healthcare in the country and his resolve that no child should suffer due to lack of dedicated medical facilities led to the foundation of Rainbow Children's Hospitals in 1999

Rainbow is currently the country's largest pediatric hospital chain with 19 hospitals spread across 6 cities

Bestowed with Healthcare leader of year award by the Financial Express, Healthcare award, 2024

Our Mission

Our aim at Rainbow Children's Hospital is to provide **highest standards of care for the mother, fetus, new born and children** so that none of them is deprived of a tertiary care facility.

Our Vision

The measure of our success is in the number of smiling faces.

Awards & Accolades

25 years of Rainbow Journey

1999-2010

Established standalone pediatric specialty hospital concept

Integrated perinatal services within the children's hospital

Expansion within Hyderabad and a new city - Vijayawada

2011-2013

Nurtured perinatal services

Enhanced Pediatric multi specialty and tertiary care services

Investment by the CDC Group, UK

2014-2017

Foray into newer cities - Bengaluru and New Delhi

Hub and Spoke model nurtured in Hyderabad

Second tranche of investment by the CDC Group, UK

2018-2025

Successful listing on the stock exchanges - NSE and BSE

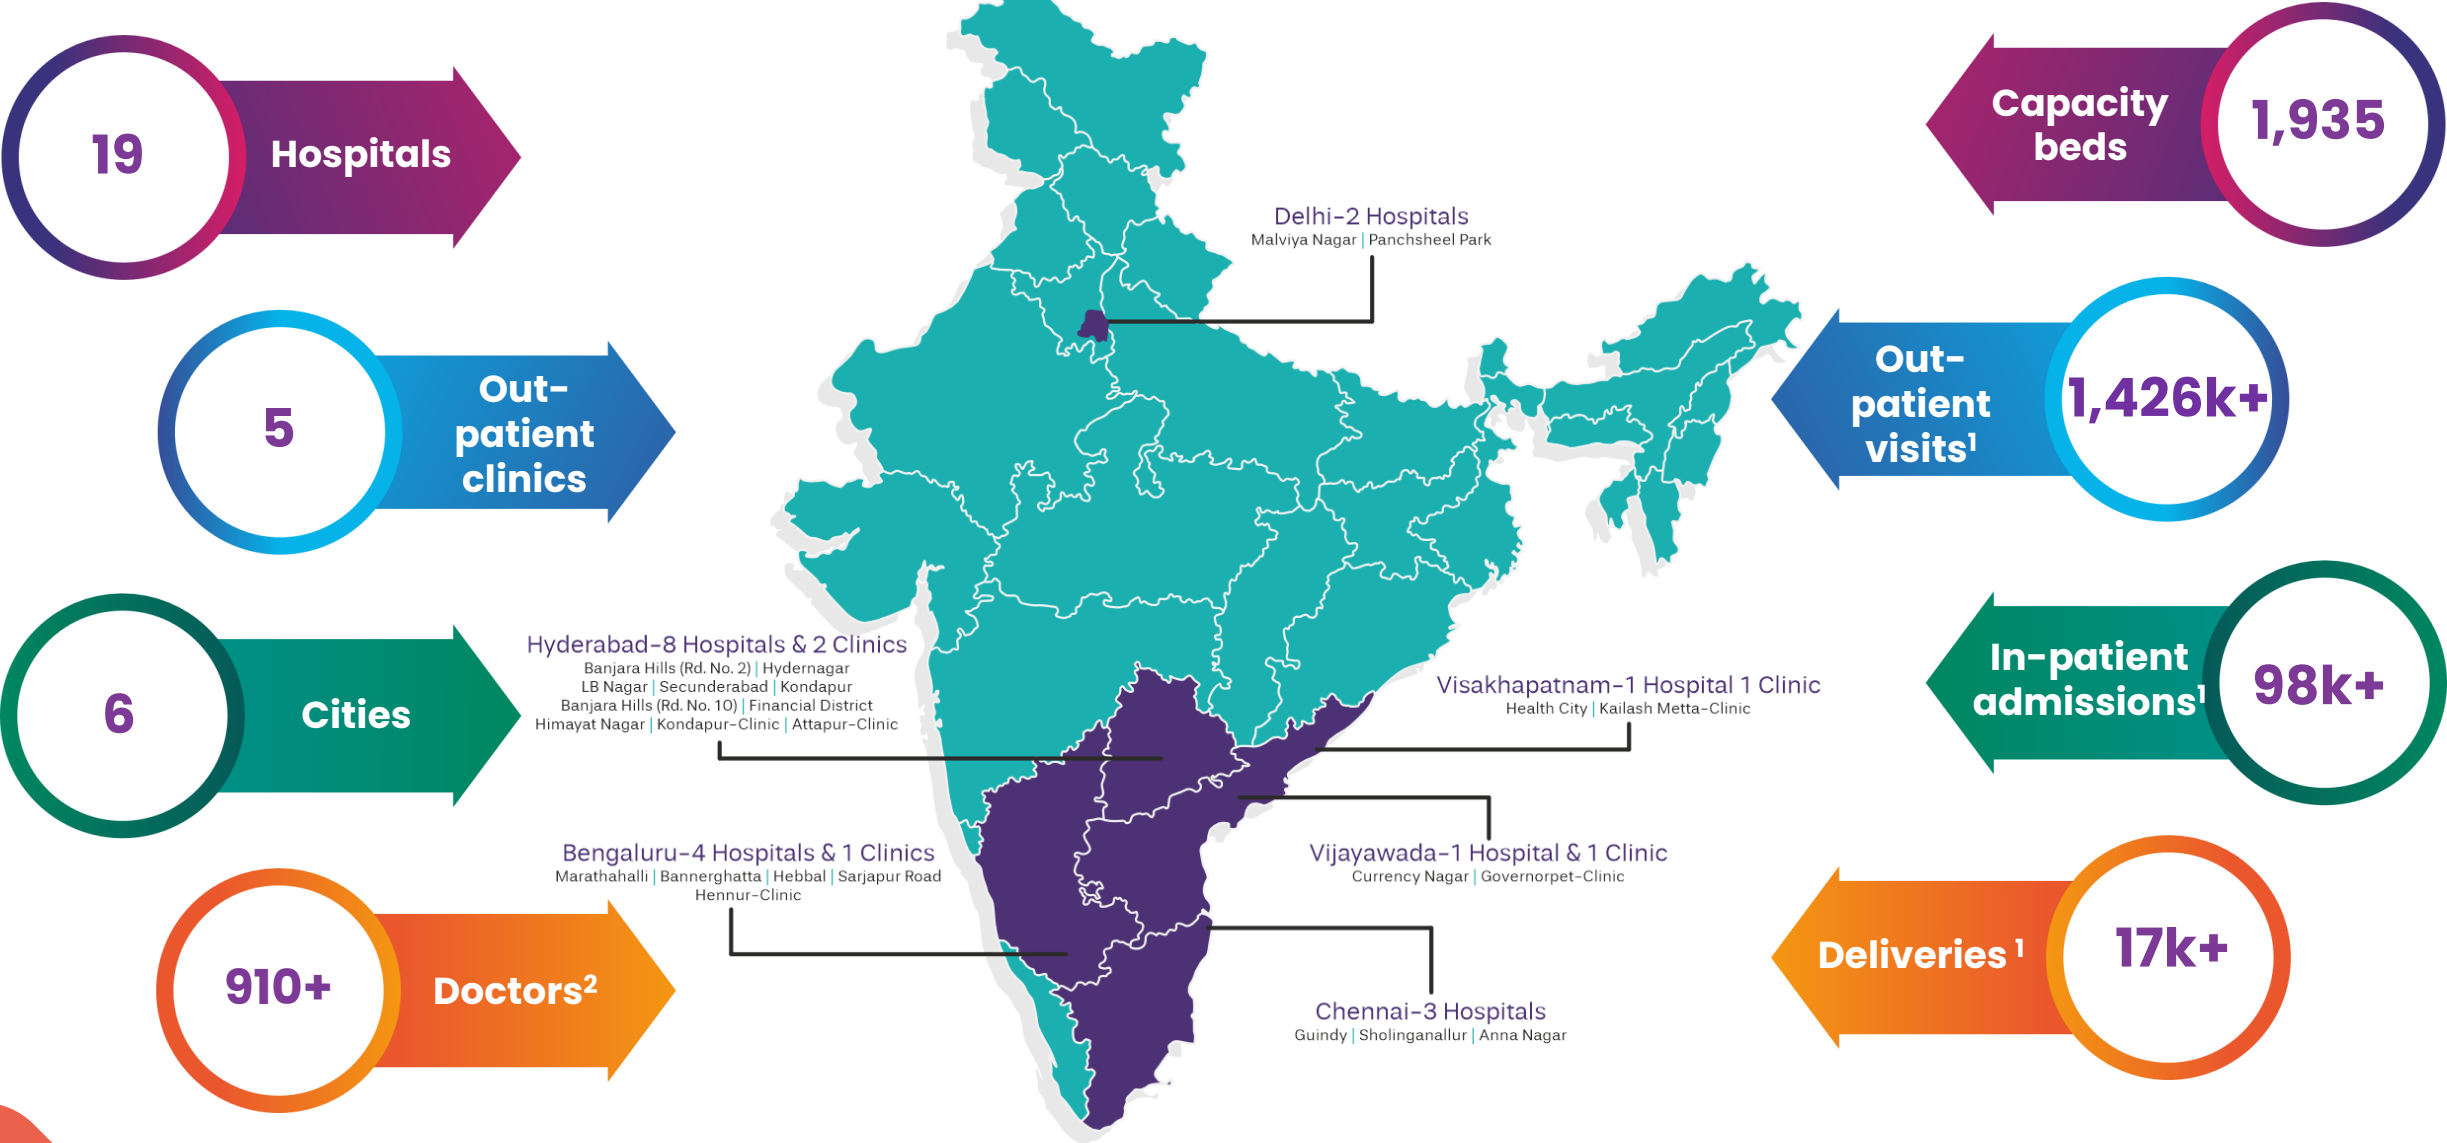

Largest chain of comprehensive pediatric care with cutting-edge quaternary care services

Largest pediatric training program in private healthcare in the country

Venturing into newer territories: Chennai and Visakhapatnam

Pioneering the way: The first pediatric and fertility hospital to earn prestigious JCI accreditation in the country

Footprint of Rainbow Hospital

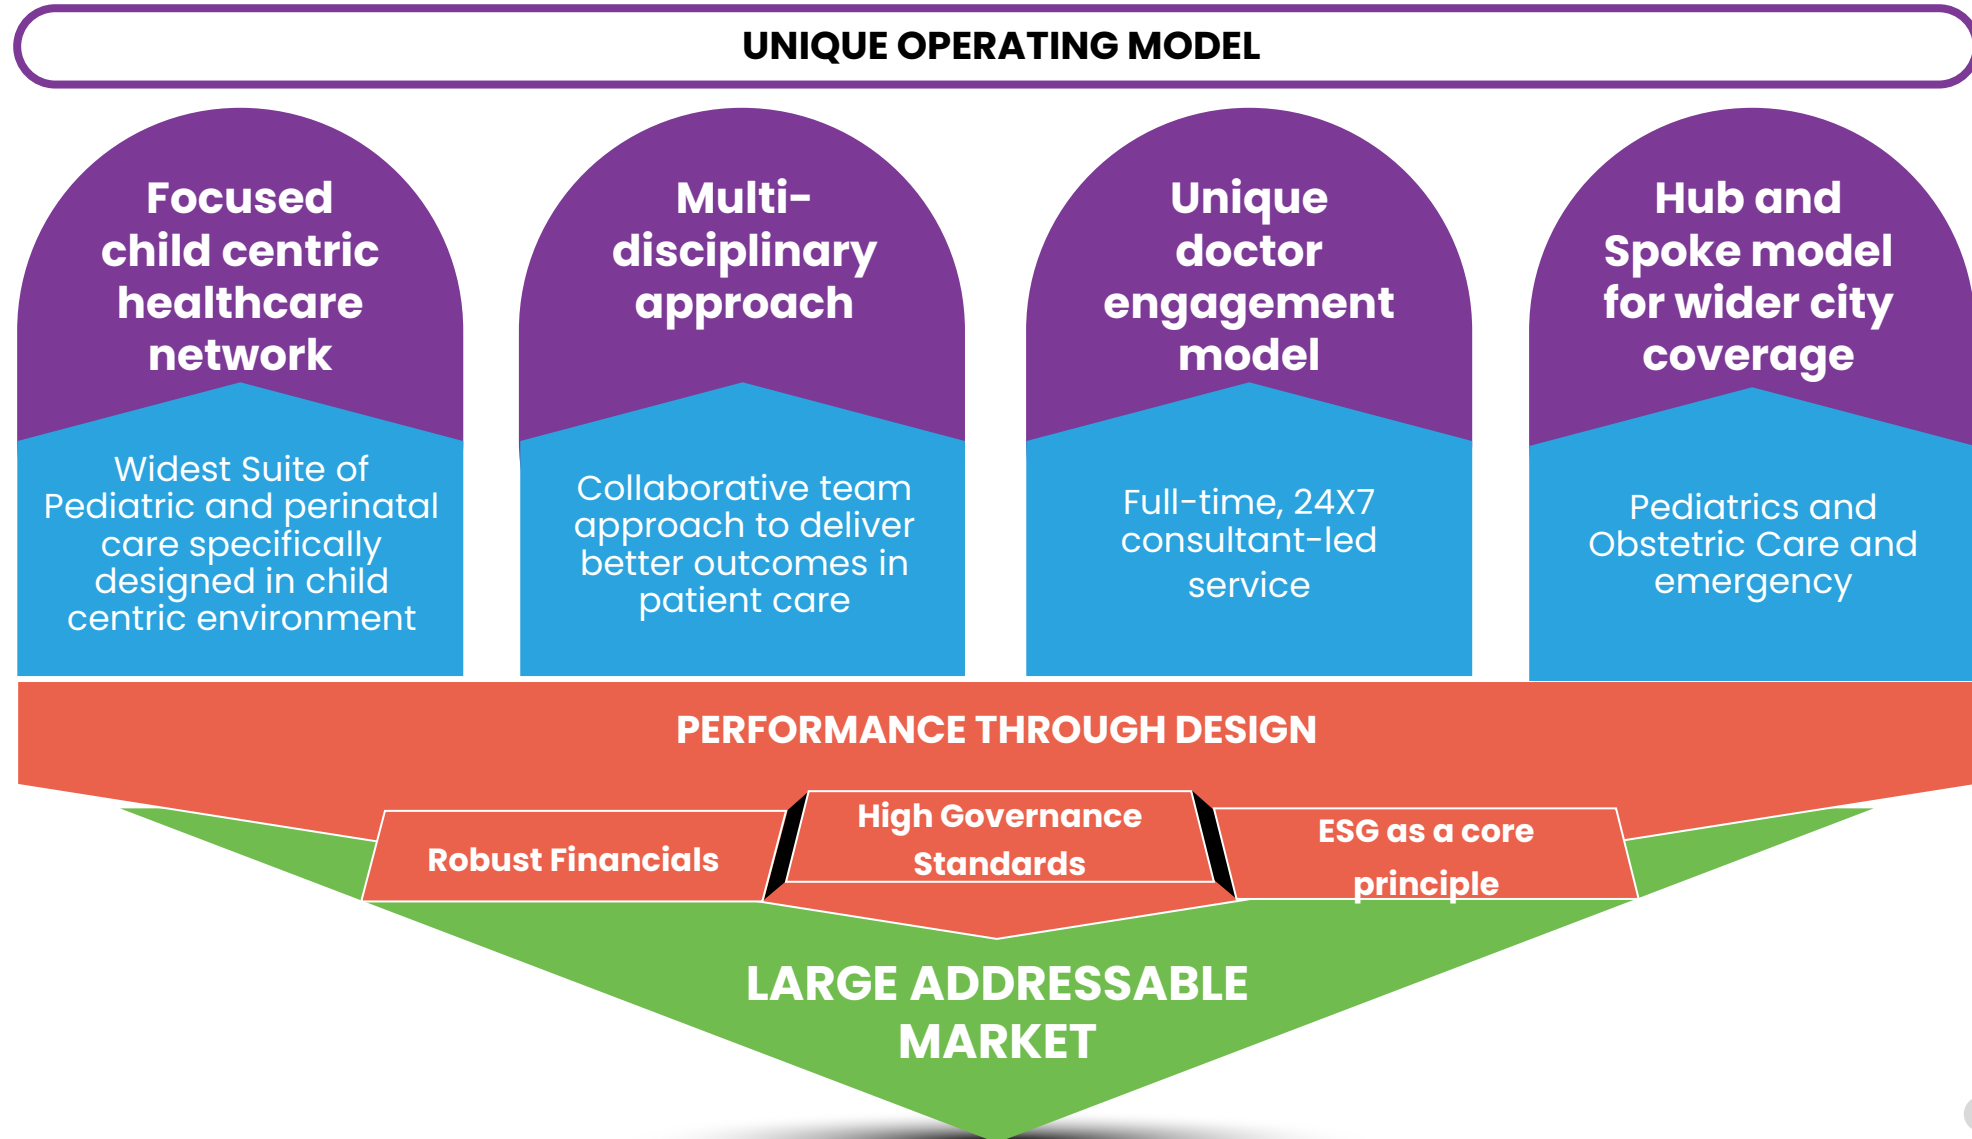

Note: ¹ Numbers for FY25; ² Including full time residents and DNB

An insight into the Rainbow approach

A novel approach in pediatrics healthcare services

Ability to conceptualize, create and operate specialized children's hospitals

Children Centric Hospitals

Children centric environment and soothing interiors help in children to recover faster

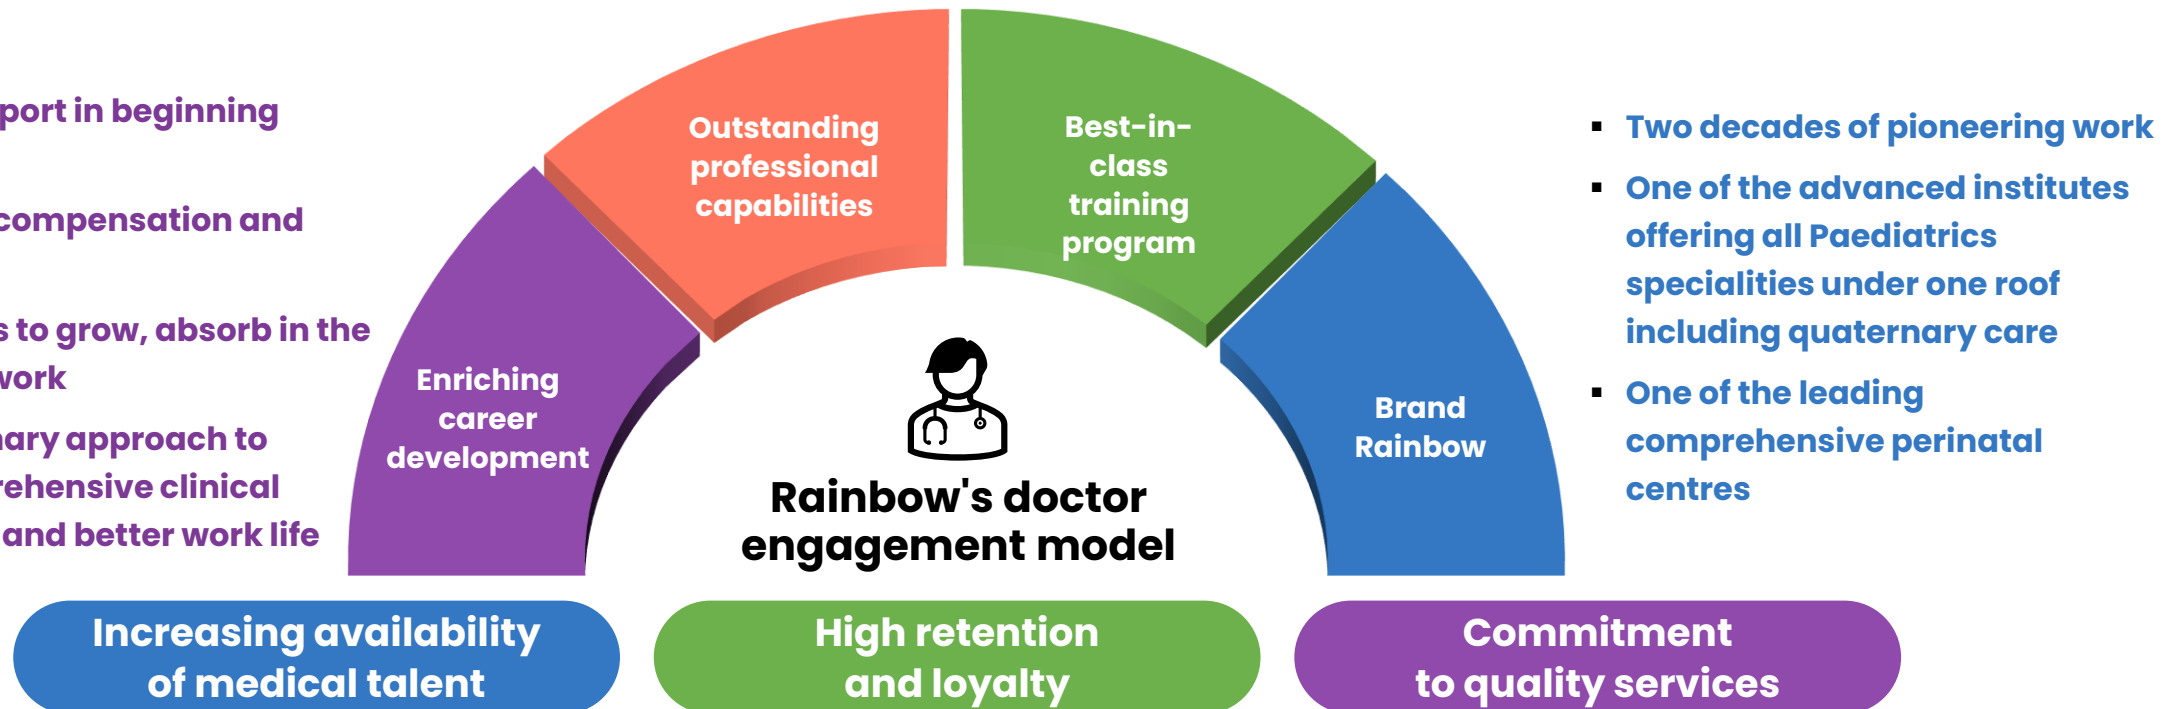

Allocation of significant portion of capex towards interiors of hospitals for creating congenial environment

Doctor engagement model fostering loyalty and sustainability with an institution-first approach

- **910+ full time doctors**
- **A number of doctors trained or possess qualifications from the UK, USA, Canada, Australia**
- **Modern infrastructure and clinical back-up to provide quality care**
- **Recognised as MRCPCH Examination Centre**
- **Recognised as training center¹ by National Board of Examinations**
- **Leading training program in India approved by National Board of Examinations**

- **Retainer/Support in beginning years**
- **Competitive compensation and rewards**
- **Opportunities to grow, absorb in the Rainbow network**
- **Multidisciplinary approach to create comprehensive clinical environment and better work life balance**

Note: ¹ For offering training in Pediatrics, Neonatology, Pediatrics Intensive Care, Pediatric sub specialities, Obstetrics and Gynaecology

The specialist in **comprehensive children's care**

Full suite of Pediatric offerings

Pediatric Secondary Care

- Pediatric outpatients
- Immunizations
- Developmental Screening
- Acute and seasonal illness

Pediatric Tertiary Intensive Care

- Care of preterm babies with low/extremely low birth weight
- Newborn emergency transports
- Neonatal surgical Services
- Advanced ventilation including HFOV
- Pediatric neurocritical care services
- ECMO services

Pediatric Multi-specialty & Quaternary Care

- Pediatric Surgery, urology and minimal invasive surgery
- Pediatric Cardiology and cardiac surgery
- Pediatric Neurology and neuro-surgery
- Pediatric Haemato-oncology
- Pediatric Gastroenterology and liver diseases
- Pediatric Nephrology
- Pediatric Pulmonology and allergy
- Pediatric transplantation (liver, kidney, bone-marrow)
- CRRT, plasmapheresis, hemodialysis

**~1/3 of Beds Allocated
to Critical Care**

**3 Hospitals
Accredited by JCI#**

**13 Hospitals
Accredited by NABH**

Comprehensive perinatal care provider, with synergies between paediatric and perinatal services

Comprehensive services for all pediatric care needs

Pediatrics

- 24*7 full spectrum of Pediatric multi specialty cover with level 4 NICU care

**Accessibility/nativity/comfort/
knows the system/strong
recommendation from pediatrician**

**Full range of fetal service included
cardiac echo/neonatologist
consultation prior to delivery**

**Coordinated handholding for both
perinatal and pediatric services**

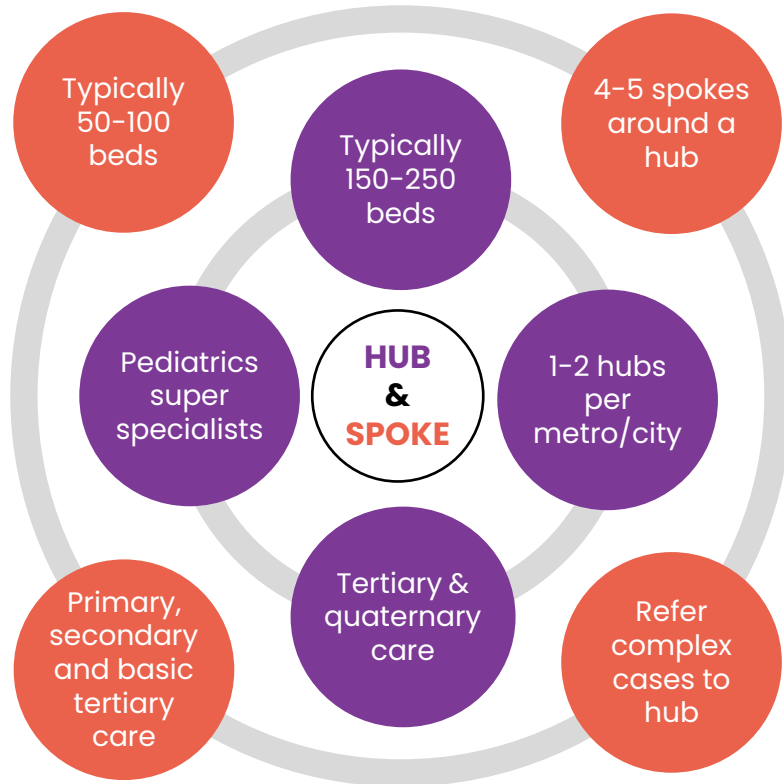

**Ease of seeing both pediatrician
and obstetrician**

Obstetrics, Fetal Medicine & Fertility
Fully integrated maternity care and fertility services

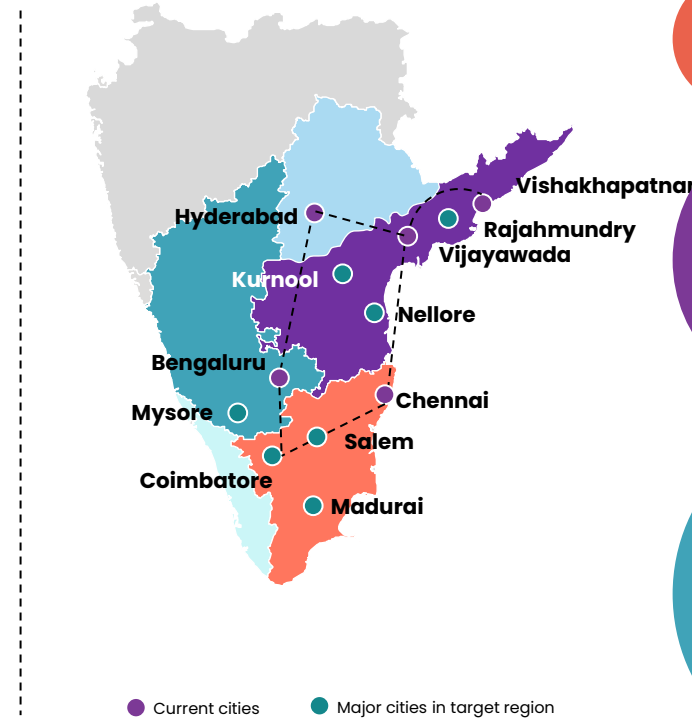

Hub and Spoke approach to **optimise delivery of patient care services** at scale

City level hub and spoke model

Accessibility of super-specialty at hubs, general pediatrics at spokes

Regional level "South Connect" model

Regional spokes at 200-250 kms from city hubs

Regional spokes to provide high quality Pediatric, obstetrics and gynaecology care at tier-II cities and act as connecting bridge to address a large market

- Robust transport network to save sick newborn and children from districts
- Establish Pediatric sub-specialty outreach clinic at districts
- Provide emergency service for maternal and Pediatric patients

Financially prudent expansion

Network effect and synergies enhance operational efficiencies

Hub & Spoke Model

Hyderabad

Bengaluru

Chennai

● Hub ● Spoke ● Upcoming Hospital

- Hub Hospital is centrally situated, providing accessibility from all part of the city
- Spokes hospitals are situated at areas experiencing rapid growth and development, strategically located to ensure convenient access for nearby towns and cities

Appendix

Rainbow's safety net & Family's Prayer – saves a tiny baby

- A desperate couple travelled all the way from **Myanmar** hoping to fulfill their dreams of having a baby after several attempts through various fertility treatments.
- They were quite excited when their IVF treatment finally worked, and the pregnancy was progressing smoothly.
- Their joy was soon met with a challenge when the mother went prematurely to labor and delivered a baby at just 24 weeks of gestation – weighing only 472 grams with low heartbeat.
- Our neonatology team, fully prepared with advanced transport and resuscitation systems, received the baby immediately and began life-saving care. We knew how much this child meant to the parents.
- The newborn went through full scale issues of prematurity like extremely low birth weight, recurrent infections, ventilator support for nearly two months also requiring total parental nutrition for growth and stability.
- Thanks to the 24/7 dedication of our medical team and the unwavering prayers of the parents, this tiny fighter made a remarkable recovery. Today, at 5 months old, the baby is thriving with a healthy brain, lungs and gut, and is expected to meet normal developmental milestones.
- **Family returned to Myanmar after 5 months for stay in Chennai**
- This incredible journey is a reminder to all of us: "It takes a lot to treat the little"

More Than Meets the Eye: A complexity of 2 rare and unusual medical disorders

- A 5-year-old child initially came to Rainbow with signs and symptoms of intestinal obstructions. But there was no sign of obstruction and was settled with medical management.
- We have also discovered severe constipation with a non-moving colon. This is a presentation of classical intestinal motility disorder.
- We also found the child had unusually high blood pressure. This case was discussed between neurologists, gastroenterologist, metabolic specialist, and a plan was laid out for investigation which included the PET Scan.
- The PET Scan demonstrated there was an underlying mediastinal mass which was diagnosed histologically as undifferentiated Neuroblastoma.
- Our oncology team believes outcome of this tumor is fairly good and we started chemotherapy and bowel issues being addressed.

Rescuing a preterm Neonate with bronchoscopy

- A preterm baby (28 weeker) after 2 months in NICU weighed just 1.1 kg with severe lung disease & acute life threatening events on ventilator
- Despite prolonged ventilator support and multiple extubation attempts, the baby continued to suffer from near cardiac arrests and extubation failures
- A newborn airway is as small as 3.5 – 4 mm and this baby required the smallest scope to perform the life saving procedure.
- A rigid bronchoscopy was attempted by the surgical team but had to be abandoned due to sudden collapse.
- A small flexible bronchoscopy was performed by the ICU team which helped in diagnosing the child's problem as multilevel airway malacia. The ICU team cleared the lung secretions making them better.
- The baby was subsequently removed from ventilator after a week's time and discharged healthy.

A Child's immunodeficiency effectively treated by Bone marrow transplantation – Wiskott Aldrich Syndrome

- An 8-month-old child was experiencing persistent fever, skin rashes on the face and limbs, and frequent respiratory infections over a two-month period.
- Child was observed to have thrombocytopenia. Genetic diagnosis confirmed the diagnosis of Wiskott-Aldrich Syndrome (WAS), a rare condition marked by immunodeficiency, thrombocytopenia, and eczema.
- The family was counseled for Hematopoietic Stem Cell Transplantation (HSCT) as a definitive treatment.
- Pre transplant complications like CMV infection and platelet refractoriness were managed efficiently.
- Post-transplant, only mild mucositis occurred, and the child received comprehensive supportive care, including prophylactic medications to prevent infections.
- By Day +13, the child achieved full engraftment with 100% donor chimerism.
- Now one month post-transplant, the child is free from infections, showing normalized blood counts, and is well on the way to full recovery—demonstrating the power of personalized, multidisciplinary care in treating complex genetic disorders.

Keyhole Surgery– To Correct Bone Deformity

- A 16-year-old child, presented with bow-legs (bilateral genu varum).
- An alignment-view X-ray confirmed the deformity around the knees.
- The child underwent a minimally invasive (keyhole) bilateral percutaneous proximal tibial corrective osteotomy with screw fixation below both knees.
- Plaster casting was applied post-surgery. The osteotomy sites healed over approximately four months, after which the child gradually resumed full activity.
- On follow-up X-ray demonstrated well-corrected leg alignment, and clinically the gait improved substantially.
- Cosmetically this surgery has left no visible scars because of being key-hole surgery.

About Us

Rainbow network comprises of 19 hospitals and 5 clinics in 6 cities, with a total bed capacity of 1,935 beds. Our Pediatric services under “Rainbow Children’s Hospital” includes newborn and pediatric intensive care, pediatric multi-specialty services, pediatric quaternary care (including organ transplantation); whereas our women care services under “Birthright by Rainbow” offers perinatal care services which includes normal and complex obstetric care, multi-disciplinary fetal care, perinatal genetic and fertility care along with gynecology services.

Rainbow Children’s Hospital built on strong fundamentals of multidisciplinary approach with a full-time consultant led clinical service along with 24/7 commitment in a child centric environment. The company follows a hub-and-spoke operating model where the hub hospital provides comprehensive outpatient, inpatient care, with a focus on tertiary and quaternary services, while the spokes provide emergency care in pediatrics and obstetrics, large outpatient services and comprehensive obstetrics, pediatric and level 3 NICU services. This model is successfully operational at Hyderabad and is gaining traction in Bengaluru. The endeavor is to replicate this approach in Chennai and across the National Capital Region. Subsequently Rainbow intends to expand into tier-2 cities of Southern India.

Rainbow embraces a unique doctor engagement model, where doctors work exclusively on a full-time, retainer basis. The doctors work in teams and have 24/7 commitment, which is particularly important for children’s emergency, neonatal, pediatric intensive care services and to support pediatric retrieval services. The Company also operates the country’s largest pediatric DNB training programme in private healthcare, offering post graduate residential DNB and fellowship programme.
